# 과제 1 풀이

3.

```
----------------------------------------------------------------
file : little_indian_song.java
----------------------------------------------------------------

public class little_indian_song {
        public static void main (String[] args){
                int boysNum = 10;
                int boyNo = 1;

                while (boyNo < boysNum) {
                        System.out.print(boyNo + " little");
                        if ((boyNo % 3) == 0) {
                                System.out.println(" indian,");
                        }
                        else {
                                System.out.print(", ");
                        }

                        boyNo++;
                }
                System.out.println(boyNo + " little indian boys");
        }
}
```
